Attention: [REDACTED]  
Contracting Officer

STATINTL

Reference: Contract No. [REDACTED]

Gentlemen:

Our proposal for the development and fabrication of film readers for bubble-chamber photographs is now under consideration by the United States Atomic Energy Commission. Many of the problems presented by this program will be similar to those presented in the development and fabrication of one Nadir determination device, in which we are now engaged on the subject contract.

We feel that many of the techniques evolving from the performance of either of these programs may be mutually beneficial to the other. Thus we feel that it would be in the best interests of the Government for both of these development programs to be performed, insofar as possible, concurrently by one contractor.

ILLEGIB

✓ We, therefore, request your authorization to inform the Atomic Energy Commission of the award of the subject contract to us, and to discuss with them the general scope of the program.

Your favorable consideration to this request will be sincerely appreciated.

Very truly yours,

STATINTL
